OBJECTIVE

BE graduate in Artificial Intelligence & Machine Learning with hands-on experience in Python, AI/ML development, SDLC activities, software testing, debugging, and technical documentation. Proven ability to collaborate in team environments, contribute to real-world software projects, and deliver within timelines. Eager to apply technical skills and learning agility as a Software Engineering Apprentice at Perceptive.

INTERNSHIP EXPERIENCE

Software Engineering Intern (AI/ML)

Feb 2026 – May 2026

VisionAstraa EV Academy, Bangalore

- **Participated in structured on-the-job training** covering Python, Data Science, Machine Learning, NLP, Computer Vision, and AI/automation across 25 guided training sessions
- **Contributed to full SDLC activities** including requirement gathering, design, development, testing, debugging, optimization, and documentation over 59 project days across 7 phases
- **Performed unit testing and module-level debugging** resolving race conditions and edge-case failures; achieved 20-minute stable continuous operation post bug resolution
- **Developed AI/automation scripts and workflows** for real-time Driver Drowsiness Detection using Python and OpenCV, achieving 88.6% detection accuracy
- **Supported regression testing and issue tracking** raising and resolving 28 peer code review comments across structured integration testing sprints
- **Documented processes and maintained project logs** producing a 26-page internship diary, README, calibration reports, and inline code documentation
- **Collaborated in cross-functional team activities** including code reviews, knowledge-sharing sessions, and a live system demonstration to faculty evaluators
- Tech: Python, SQL, OpenCV, Pandas, NumPy, Scikit-learn, Flask, REST API, Git, GitHub

EDUCATION

Bachelor of Engineering – Artificial Intelligence & Machine Learning

CGPA: 8.89 / 10

Sambhram Institute of Technology (VTU Affiliated)

2022 – 2026

Pre-University (PUC) – Science

84%

KLE PU College, Rajajinagar

2020 – 2022

Secondary School (SSLC)

88%

Guru Shree Vidhya Kendra

Completed 2020

SKILLS

Programming Languages: Python, C, C++, SQL, JavaScript

AI/ML & Automation: Machine Learning, NLP, Computer Vision, Scikit-learn, OpenCV, Data Preprocessing, Model Evaluation

Software Development: REST APIs, Flask, OOP, SDLC, Debugging, Unit Testing, Code Reviews

Data & Analytics: Pandas, NumPy, Matplotlib, Power BI, Tableau, Excel

Databases: MySQL, SQL

Documentation & Reporting: Technical Reports, Process Logs, README Writing, Project Diaries

Tools & Platforms: Git, GitHub, Visual Studio Code, Jupyter Notebook, Google Colab, Postman

Soft Skills: Learning Agility, Teamwork, Communication, Problem Solving, Adaptability

PROJECTS

Driver Drowsiness & Distraction Detection — AI/Automation System

- **Developed a real-time AI automation system** through a 7-phase structured SDLC achieving 88.6% accuracy, <0.5s alert latency, and <3% false positive rate

- **Built and validated a multi-metric risk scoring engine** combining 7 behavioral signals into a weighted 13-point score with 3-level graduated alert response
- **Supported regression and integration testing** across all modules and deployed the model as a REST API using Flask with Postman-based validation
- **Tech:** Python, OpenCV, Flask, REST API, Pandas, NumPy, Scikit-learn, Git, GitHub

Sales Analytics Dashboard

- **Analyzed 50,000+ sales transactions** using SQL and Python to extract KPIs and business insights
- **Built interactive Power BI dashboards** for tracking revenue, profit, and regional performance
- **Tech:** SQL, Python, Pandas, Power BI, Excel

Credit Card Fraud Detection

- **Built an ML classification model** with SMOTE-based data handling and documented Precision, Recall, F1-Score results
- **Tech:** Python, Pandas, Scikit-learn, Matplotlib

Movie Recommendation System

- **Developed an AI-driven recommendation engine** using content-based filtering and NLP sentiment analysis
- **Tech:** Python, Pandas, Scikit-learn, NLP
