OBJECTIVE

Artificial Intelligence and Machine Learning graduate with hands-on experience in Data Analytics, SQL, Python, Power BI, Tableau, statistical analysis (hypothesis testing, A/B testing fundamentals), and Exploratory Data Analysis (EDA). Passionate about transforming raw data into business insights through predictive reporting, dashboard development, and cross-functional collaboration with product, marketing, and operations teams. Seeking a Data Analyst role to support data-driven decision making.

INTERNSHIP EXPERIENCE

AI/ML Intern

Feb 2026 – May 2026

VisionAstraa EV Academy, Bangalore

- Completed a structured AI/ML training program covering Python, Data Science, Machine Learning, NLP, and Computer Vision
- Built a Driver Drowsiness & Distraction Detection system using OpenCV and dlib, achieving 88.6% detection accuracy with under 0.5 second alert latency
- Performed Exploratory Data Analysis (EDA) and statistical distribution analysis on NTHU-DDD and UTA-RLDD datasets to validate detection thresholds via hypothesis testing
- Designed a CSV-based session logging system capturing 9 metrics per frame with a post-session Python analytics script, ensuring data quality and accuracy throughout the pipeline
- Deployed a trained ML model as a REST API using Flask and Pickle; demonstrated end-to-end inference via Postman
- *Tech: Python, OpenCV, Pandas, NumPy, Scikit-learn, Matplotlib, Flask, SQL*

EDUCATION

Bachelor of Engineering – Artificial Intelligence & Machine Learning

CGPA: 8.89 / 10

Sambhram Institute of Technology (VTU Affiliated)

2022 – 2026

Pre-University (PUC) – Science

82%

KLE PU College, Rajajinagar

2020 – 2022

Secondary School (SSLC)

88%

Guru Shree Vidhya Kendra

Completed 2020

SKILLS

Programming Languages: Python, C, C++, SQL, JavaScript

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel, Statistics, Probability, Hypothesis Testing, A/B Testing, Data Cleaning, Data Transformation

Machine Learning & AI: Machine Learning, NLP, Sentiment Analysis, Feature Engineering, Data Preprocessing, Model Evaluation, EDA, TensorFlow, Neural Networks

Libraries & Frameworks: Scikit-learn, OpenCV,

Databases: MySQL

Tools & Technologies: Power BI, Git, GitHub, Excel, PowerPoint

Platforms & IDEs: Jupyter Notebook, Google Colab, Visual Studio Code, PyCharm

Soft Skills: Problem Solving, Analytical Thinking, Cross-Functional Collaboration, Communication, Adaptability

PROJECTS

Sales Analytics Dashboard

- Cleaned and transformed 50,000+ sales records using SQL and Python
- Conducted Exploratory Data Analysis (EDA) to identify revenue trends and customer purchasing patterns
- Designed interactive Power BI dashboards to monitor KPIs, profit margins, regional sales, and customer segmentation for cross-functional stakeholders
- Delivered actionable insights that supported business decision-making

➤ **Tech Stack:** *SQL, Python, Pandas, Power BI, Excel*

Customer Churn Prediction and Analysis

- Analyzed customer behavior data to identify factors contributing to customer churn using EDA and statistical analysis.
- Built a machine learning model to predict customer churn using Logistic Regression and Random Forest with performance evaluation using Accuracy, Precision, Recall, and F1-score.
- Developed interactive Power BI dashboards to monitor churn trends, customer segments, and retention KPIs.
- Generated actionable business insights to improve customer retention strategies through data-driven recommendations.
- **Tech Stack:** Python, SQL, Pandas, Scikit-learn, Power BI, MySQL

E-Commerce Sales Analytics Platform

- Analyzed 100,000+ e-commerce sales records using Python and SQL to identify revenue trends, customer behavior, and business performance
- Performed data cleaning, transformation, and EDA — handling missing values, duplicates, and outliers to improve data quality and pipeline reliability
- Built interactive Power BI dashboards to visualize KPIs including revenue, profit, sales trends, customer segmentation, and regional performance
- Wrote optimized SQL queries to extract, aggregate, and analyze sales data across multiple business dimensions
- Generated actionable, predictive business reports through trend analysis, product performance evaluation, and customer purchase behavior modeling
- Implemented time-series forecasting to predict future revenue trends and support business planning
- **Tech Stack:** *Python, SQL, Pandas, Power BI, Excel, MySQL*

Movie Recommendation System (Content + Sentiment-Based)

- Developed a content-based movie recommendation system using TF-IDF Vectorization and Cosine Similarity to recommend movies based on genres, cast, crew, and plot descriptions
- Performed data preprocessing, feature engineering, and sentiment analysis using NLP techniques to improve recommendation relevance and quality
- Integrated the TMDB API to fetch movie posters, ratings, and metadata, enhancing the user experience with real-time movie information
- Built and deployed a Flask-based web application delivering personalized movie recommendations through an interactive, user-friendly interface
- **Tech Stack:** *Python, Pandas, Scikit-learn, NLP, Flask, TMDB API*
